

MOUNT

KP34-44

The line of one-piece mounts is designed for installation of the scope on the rifle of caliber up to .50BMG according to Russian military standards. A mount is fully machined from solid, high-grade aluminum B95 (7075) to avoid squeezing of the scope and its accurate installation. Turrets are observed properly due to half-rings setting at a 45° angle. There is a surface interface for installation of the optional equipment (Reflex Red Dot sight, laser, etc.). Hexagonal nuts Sw12 and the screw driver knife allow to fasten the scope on Picatinny rail with 100 percent repeatability

Specifications:

Dimensions, mm	135 x 49 x 73
Tube diameter, mm	34
Height to optical axis, mm	44
Inclination, MOA	0 / 15 / 20 / 30
